

## Fields

| Name                              | Type                       | Description |
|-----------------------------------|----------------------------|-------------|
| ValueSelected <b>[DEPRECATED]</b> | string <b>[DEPRECATED]</b> | (ReadOnly)  |
| TextSelected <b>[DEPRECATED]</b>  | string <b>[DEPRECATED]</b> | (ReadOnly)  |
| ValueChosen <b>(NEW)</b>          | string <b>(NEW)</b>        | (ReadOnly)  |
| TextChosen <b>(NEW)</b>           | string <b>(NEW)</b>        | (ReadOnly)  |

## Events

| Name                | Description  |
|---------------------|--|
| Chosen <b>(NEW)</b> | Is called when item is chosen <b>(NEW)</b>                   |
| OnChangeSelected    | Is called when the Selected item is changed                  |
| Validate            | Is called when the picker is validate(if is empty- optional) |

## Properties

| Name                 | Type   | Description  |
|----------------------|--------|--|
| Width <b>(new)</b>   | double | set width <b>(new)</b>   |
| Title                | string | Set the Title  |
| IsReadOnly           | bool   | Property to report if PickerBox is IsReadOnly                                    |
| CamEmpty             | bool   | Property to report if PickerBox is nullable                                      |
| LabelMessageError    | Label  | If you needs a message error in screen<br>inform label to set text to validation |
| TextColor            | Color  | Color of text  |
| BackgroundColor      | Color  | Set BackgroundColor  |
| BackgroundColorError | Color  | Set BackgroundColorError when is invalid<br>value                                |
| BorderColor          | Color  | Set BorderColor  |

|                         |              |   |
|-------------------------|--------------|---|
| <b>BorderColorError</b> | <b>Color</b> | <b>Set BorderColorError when is invalid value</b> |
|-------------------------|--------------|---|

|                           |             |  |
|---------------------------|-------------|--|
| <b>ChangeMessageLabel</b> | <b>bool</b> | <b>Informs if you use message default validation or message is yours (See LabelMessageError)</b> |
|---------------------------|-------------|--|

|                  |                    |  |
|------------------|--------------------|--|
| <b>ListItems</b> | <b>IEnumerable</b> | <b>Informs IEnumerable contained</b>               |
|                  |                    | <b>the list of object with values to load data</b> |

|                   |               |   |
|-------------------|---------------|---|
| <b>ValueField</b> | <b>string</b> | <b>Informs name of field(value) inside class object</b> |
|                   |               | <b>use with (ListItems)</b>                             |

|                  |               |  |
|------------------|---------------|--|
| <b>TextField</b> | <b>string</b> | <b>Informs name of field(Text) inside class object</b> |
|                  |               | <b>use with (ListItems)</b>                            |

|               |                  |                   |
|---------------|------------------|-------------------|
| <b>Margin</b> | <b>Thickness</b> | <b>Set Margin</b> |
|---------------|------------------|-------------------|

|                |                  |                    |
|----------------|------------------|--------------------|
| <b>Padding</b> | <b>Thickness</b> | <b>Set Padding</b> |
|----------------|------------------|--------------------|

|                 |               |                     |
|-----------------|---------------|---------------------|
| <b>FontSize</b> | <b>double</b> | <b>Size of text</b> |
|-----------------|---------------|---------------------|

| <b>Methods</b> |                    |   |
|----------------|--------------------|---|
| <b>Name</b>    | <b>Return Type</b> | <b>Description</b>                        |
| ForceValidate  | void               | Validate the field with the current value |
