

| Fields | | |
|---------|--------|-------------|
| Name | Type | Description |
| Number | string | (ReadOnly) |
| IsValid | bool | (ReadOnly) |

| Events | |
|------------|--|
| Name | Description |
| EnterField | Is called when user enter in NumericBox |
| Validate | Is called when the NumericBox is validate, sender is the NumericBox type that contains the IsValid and Number fields with the current value. |

| Properties | | |
|--------------------|---------------|------------------------|
| Name | Type | Description |
| Width (new) | double | set width (new) |

| | | |
|----------------|----------------|--|
| ValidationType | ValidationType | Set if is CharacterToChacater or WhenLoseFocus |
|----------------|----------------|--|

| | | |
|------------|------|--|
| IsReadOnly | bool | Property to report if NumericBox is IsReadOnly |
|------------|------|--|

| | | |
|----------|------|--|
| CanEmpty | bool | Property to report if NumericBox is nullable |
|----------|------|--|

| | | |
|---------------|--------|------------------------------------|
| DefaultNumber | double | Initial number in box if necessary |
|---------------|--------|------------------------------------|

| | | |
|------------------|-----|---|
| NumberOfDecimals | int | If ValidationType is double set number of decimals to validation |
|------------------|-----|---|

| | | |
|---------|--------|-------------------------|
| Minimum | double | Min value to validation |
|---------|--------|-------------------------|

| | | |
|---------|--------|-------------------------|
| Maximum | double | Max value to validation |
|---------|--------|-------------------------|

| | | |
|----------|--------|----------------------|
| FontSize | double | Size of text(number) |
|----------|--------|----------------------|

| | | |
|----------|----------------|-----------------------|
| FontType | FontAttributes | (None, Bold, Italic). |
|----------|----------------|-----------------------|

| | | |
|-------------------|-------|--|
| LabelMessageError | Label | If you needs a message error in screen inform label to set text to validation |
|-------------------|-------|--|

| | | |
|-------------|-------------|-----------------------------|
| NumericType | NumericType | Set if is Integer or Double |
|-------------|-------------|-----------------------------|

| | | |
|-------------------------|---------------|----------------------|
| HorizontalTextAlignment | TextAlignment | (Start, Center, End) |
|-------------------------|---------------|----------------------|

| | | |
|--------------------|---------|--|
| NumberColor | ColorUI | Color of Number(text) |
| NumberColorError | ColorUI | Color of Number(text) when is invalid value |
| ColorUI | ColorUI | Set ColorUI (BackgroundColor) |
| ColorUIError | ColorUI | Set ColorUI when is invalid value |
| FontFamily | string | Set FontFamily |
| ChangeMessageLabel | bool | Informs if you use message default validation or message is yours (See LabelMessageError) |
| Placeholder | string | Set Placeholder (works if only DefaultNumber is Null) |
| PlaceholderColor | ColorUI | Set PlaceholderColor |
| BorderColor | ColorUI | BorderColor of box draw |
| BorderColorError | ColorUI | BorderColor of box draw when value is invalid |

| Methods | | |
|----------------|--------------------|---|
| Name | Return Type | Description |
| ForceValidate | void | Validate the field with the current value |
